They are now at all the entrances rather than in the pews. We will continue to monitor them and follow-up with responding to interested parties.

- ***Census Data***

Families Registered (2016) 3972 (adults) 927 registered but not using envelopes although some may be contributing online.

Regular Contributors 933 envelopes

Newly Registered (May '16 to May '17) 34

- ***Registration Procedure***

Father Pierz will speak with ***Paula*** about giving him the contact information once they have filled in the registration form and then he will contact them to set up a meeting. A member of our commission can also follow-up and arrange a meeting or perhaps a tour.

- ***Welcome Packet Sample***

We will go ahead and put a sample of our own together for approval in the fall.

- ***Prayer Partners for Those Receiving Sacraments***

This is something we feel is very important to implement although we still need input from other commissions. Each person preparing for a sacrament would have their name selected by a parishioner(s) who will pray daily for them. We would somehow give the prayer partner's name to the candidate. We're hoping this simple yet profound gesture will work to promote unity.

- ***CatholicCloud***

. . . Is a brand new company. Mikie has been in touch with the company and so far it looks pretty good. It provides an app. that all parishioners can access.

On it there would be a picture of our church and information such as Mass/ Confession times, parish contact names and numbers, and anything else we want to input. It also is a vehicle for instant messaging such as, "CCD is canceled due to snow." Parishioners will know they can check the app for any changes in any program! It's free of charge but I still have questions and will be in contact with the company.

- ***Schedule of Mtg. Dates***

We will be meeting in the summer but will be putting ALL dates in the bulletin in a couple of weeks.

- ***CD's***

So far 26 have been sold (\$150)

- ***Alpha (still on hold)***

- ***ACTS (handout)***

At this time we are looking to implement this but we need more answers to our questions.
